Bones' Dental Journey to Wellness

Updated about a week ago

On Monday this week, Bones underwent major surgery on his significant mouth. Dr Gerhard Steenkamp, the only specialist Maxillofacial surgeon in Africa was flown up, from SA, to perform this surgery. Dr Marabini and Dr Dutlow of Aware Trust have been treating Bones with heartfelt care and attention. They both assisted with the anaesthetic and the procedure. Dr Milan Djorkevic very kindly came out to observe and help ... he supplied the Vets with a drilling machine that was of huge help! Vanessa Furness of ZNSPCA was on site to

ensure that all our welfare issues were correctly taken care of, and to offer moral support. I wish to thank the entire Team who made this event possible! Bones has made a remarkable recovery and is already looking much better! Please remember to take the dental health of all your animals seriously! It is an underestimated problem, and can be painful to the extreme if left untreated. Thanks to you all for your kind words and fabulous support and encouragement. ONE BY ONE! xxx
